

Microsoft Threat Protection Workshop

Learn how to put next-generation Microsoft security tools to work for you.

Workshop highlights

 Identify real threats to your cloud environment with Threat Check

 Understand your security goals and objectives

 Deliver the end-to-end Microsoft security story

 Showcase security scenarios with product demos

 Develop joint plans and next steps

“The Threat Protection Security Workshop helped us understand our maturity levels on different sectors of cyber security.”

-Harri Kivimaa, Head of End User Services, VTT

Do you know how many phishing attacks your organisation has received? If employees are using the right password protocol? Whether personal data is being exposed? In short, is your organisation’s cloud environment as secure as you think it is?

Improve your security posture with a Microsoft Threat Protection Workshop

Organisations today are managing growing volumes of data and alerts while dealing with tight budgets and vulnerable legacy systems. Get help achieving your broader security objectives – and identify current and real threats – by scheduling a Microsoft Threat Protection Workshop.

We can help you develop a strategic plan customised for your organisation and based on the recommendations of Microsoft cyber security experts. You’ll gain visibility into immediate threats across email, identity, and data, plus clarity and support on how to upgrade your security posture for the long term.

Why attend?

Given the volume and complexity of identities, data, applications, devices, and infrastructure, it’s essential to learn how secure your organisation is right now, and how to mitigate and protect against threats moving forward. By attending this workshop, you can:

Identify current, ongoing risks to your cloud environment

Walk away with actionable next steps based on your specific needs and objectives

Document your security strategy for the benefit of key stakeholders

Better understand how to accelerate your security journey using the latest tools

What to expect:

During this-workshop, we'll partner with you to strengthen your organisation's approach to cyber security. We'll help you better understand how to prioritise and mitigate potential attacks, with:

- Deep analysis from Threat Check of cyber attack threats found targeting your organisation
- Actionable recommendations to help immediately mitigate the identified threats
- A detailed assessment of your IT and security priorities and initiatives, direct from cyber security pros
- An inside look at Microsoft's holistic approach to security, and how it relates to your organisation
- Demonstrations of integrated security, including the latest tools and methods
- Long-term recommendations from Microsoft experts about your security strategy, with key initiatives and tactical next steps
