-  Explore recommendations and next steps

93%

of organisations are concerned about insider risks.<sup>1</sup>

For the majority of organisations, external cybersecurity risks have been top of mind for many years. But these organisations are now considering the risks posed by trusted insiders as an equal or even bigger threat. Organisations are beginning to recognise the importance of establishing controls that enable them to quickly identify and manage insider risks.

### Intelligently investigate and take action on insider and privacy risks

Detect, investigate, and act on malicious and inadvertent activities in your organisation is critical to ensuring trust, creating a safe workplace and protecting company assets and employee and customer privacy.

The Mitigate Compliance & Privacy Risks Workshop gives you the insights you need to understand insider and privacy risks in your organisation.

**As your business-critical data expands and your workforce shifts to remote work, having an integrated approach that can help quickly identify, triage, and act on risky insider user activity is more important than ever.**

By attending this workshop, our experts will work with you to:

Document your objectives and strategy around insider and privacy risks.

Show how to detect investigate and take action on insider and privacy risks.

Demonstrate ways to accelerate your compliance journey with the latest Microsoft technologies

Provide actionable next steps based on your needs and objectives

<sup>1</sup> IBM. Future of Cognitive Computing. November 2015

# User Risk Check uncovers risks that might be harmful to your organisation

The User Risk Check is the core activity of the Mitigate Compliance & Privacy Risks Workshop. The activity is spread out over several weeks to allow time to run on top of your cloud infrastructure and discover and identify insider and privacy risks in your organisation. The User Risk Check leverages automated Microsoft 365 tools and services to monitor user behaviour and communication to discover inadvertent or malicious behaviour that can impose risk to your organisation.

The automated discovery process will monitor user behaviour and communication for:

- Data leaks, accidental oversharing or malicious intent
- Data theft by departing employees
- Inappropriate text in corporate communication
- Sensitive information
- Conflict of interest
- Data overexposure
- Cross border data transfers

## What to expect

By the end of this workshop, experts in Microsoft compliance will provide you with a:

- ✓ User Risk Check report that includes findings and insights from the automated discovery process
- ✓ A list of recommendations and actionable next steps that will help mitigate the identified risks
- ✓ Clear look into Microsoft's approach to mitigating and controlling insider and regulatory risks.
- ✓ Compliance Manager Tenant Assessment report with suggestions and top key improvement actions.
- ✓ Set of long-term recommendations on your compliance strategy, with key initiatives and tactical next steps
