# Manage complex issues, simplify your experience

Tackle cybersecurity with the right balance of people, technology, and processes from ITC Secure and Microsoft
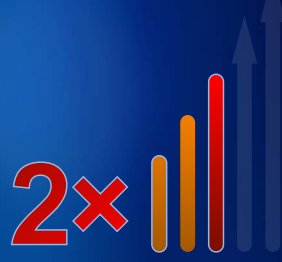

Enterprise IT teams face new challenges as their digital footprint grows...

78% of CISOs have 16 or more tools in their cybersecurity vendor portfolio; 12% have 46 or more.[1]

The number of unfilled cybersecurity jobs increased by 350% in 9 years – from 1 million in 2013 to 3.5 million in 2021.[2]

2× Cybersecurity insurance claims have doubled in the past three years and attacks are only expected to increase, resulting in a significant rise in insurance premiums.[3]

Yet businesses are struggling to identify the right cyber resources and strategy

As your business increases in complexity, your natural instinct may be to add more security tools to an already layered IT ecosystem. But if these solutions don't integrate seamlessly, they can end up creating more visibility issues and noise.

Recruiting and retaining qualified cybersecurity professionals is difficult and expensive, especially at the level needed to maintain a robust security operations center in-house.

Insurance alone is no longer a feasible option for addressing cybersecurity challenges. In addition to the direct expense posed by high premiums and limited coverage, stakeholders expect businesses to maintain a strong and effective cybersecurity system in order to transact competitively in the digital market.

The good news is the complexity can be managed

Offload stress and workload by adding threat detection experts to your team. ITC Managed Extended Detection and Response (MXDR) powered by Pulse utilizes Microsoft Sentinel and the Microsoft 365 Defender Security product portfolio to strengthen and simplify your approach to security operations.

Capitalize on ITC Secure's host of talented professionals and economies of scale to access a state-of-the-art security operations center for a fraction of the cost. You are always covered with 24/7 support from our security experts.

Enter new markets with confidence by proactively preparing your business to defend and handle threats. ITC MXDR has you covered with continuous threat monitoring, threat intelligence integration, advanced analytics, and threat hunting.

Confidently keep threats at bay with ITC MXDR powered by Pulse

Microsoft verified solution
ITC Secure is a Microsoft Solutions Partner with Microsoft Verified MXDR Solution Status; we are equipped to help you capitalize on your Microsoft Security product portfolio.[4]

Security excellence is in our DNA
Recognized as the "Cyber Security Company of the Year" at the UK Business Tech Awards 2022, security excellence is truly in our DNA.[4]

Decades of expertise
With over 25 years of experience delivering business-critical services, ITC Secure is ready to help your business reap the benefits of digital transformation today and tomorrow.[5]
