ITC SECURE

IDENTITY AT THE CORE

Accelerate Zero Trust implementation to deliver proactive security.

> " Microsoft Zero Trust solutions deliver **92%** return on investment.* "

Compared to the same period in 2022, the number of attempted attacks increased from around 3bn per month to over 30bn with an average of 4,000 password attacks per second.** This was particularly prevalent in organisations with a low security posture, typically without multifactor authentication enabled for their users.

Furthermore, ongoing challenges in the industry that businesses continue to contend with, including the upsurge in artificial intelligence, phishing-as-a-service and adversaries becoming more creative, emphasises the importance of securing your identity perimeter.

This means that identity and access management is now a critical requirement for the modern-day enterprise.

Address common identity challenges that align with your business priorities.

Ensure regulatory compliance

Meet regulatory requirements and comply with industry standards— avoiding penalties and reputational damage associated with non-compliance.

Simplify the complex

Streamline identity and access management processes and reduce administrative burdens. Utilise automated provisioning and deprovisioning of user accounts and access rights, underpinned by Zero Trust controls.

Gain access to the right skills and resources

Increase productivity and efficiency with experts who work with you to ensure your identity and access management solution is configured and customised to meet your business objectives.

Optimise your investments

Establish if existing investments are being utilised to their full potential and reduce internal overhead spend with access to external resources without exceeding budget.

Successfully managing the new security perimeter.

Underpinned by a Zero Trust architecture, strengthen your defences with versatile solutions to cater for dynamic environments and applications existing in the cloud or on-premise. Our identity experts will take the complexity out of your identity and access management lifecycle every step of the way.

We take you on a journey.

At ITC, we understand that implementing a Zero Trust architecture is not achieved overnight. Balancing budget and available resources to address the most urgent security gaps while delivering against a broader programme of work, managed over time, is often the optimal way forward for most enterprises we talk to.

Starting with an identity maturity assessment, we will work with you to build a tailored programme, often in a multi-phased project approach, based on and driven by your business objectives and security requirements while being sensitive to any internal resource and budget constraints.
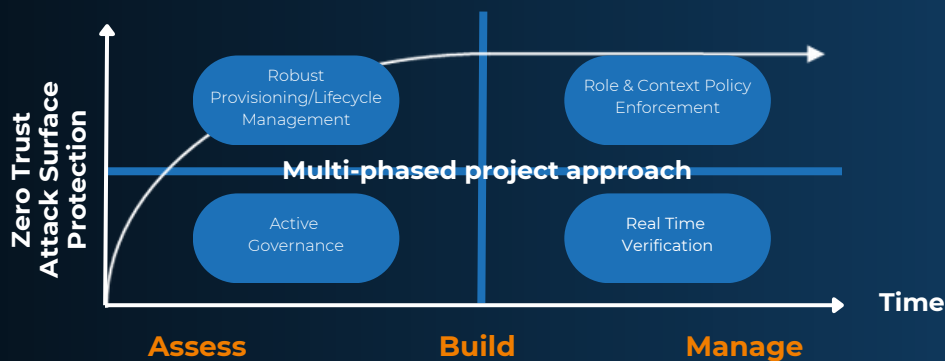

ITC has amassed decades of identity experience with in-house consultants, and together with our partner expertise, both are on hand and ready to support your business on your journey.
