

DATA SECURITY SERVICES

Secure your sensitive and critical data assets across your business environment.

Data is often your most valuable asset and your greatest risk

Understanding your data begins with a solid foundation of governance: defining policies, controls, risk appetite, and regulatory obligations. From this foundation, the challenge shifts to protecting sensitive information in ways that adapt and evolve alongside your organisation's needs.

ITC Secure guides you through this journey using a phased, scalable approach. Powered by Microsoft Purview, we help businesses advance their data security posture, from establishing foundational controls to implementing proactive, adaptive strategies. This includes the integration of generative AI to enhance protection, ensuring alignment with both compliance requirements and overarching business goals.

ADDRESS COMMON DATA SECURITY CHALLENGES WITH REAL OUTCOMES

DATA GOVERNANCE

Progress through security phases aligned with your capabilities.

VISIBILITY & CONTROL

Discover, classify, and protect data across your environment within Microsoft Purview.

OPERATIONAL INTEGRATION

Embed security into daily processes and culture.

ADVANCED THREAT DETECTION

Use analytics and machine learning to identify risks in real time.

STRATEGIC ENABLEMENT

Turn data security into a competitive advantage.

ITC'S UNIFIED APPROACH TO DATA SECURITY

Powered by Microsoft Purview, ITC's approach delivers a unified solution with a pragmatic step-by-step methodology built on four key building blocks.

1

Data security readiness:

- › Assess the data governance maturity of your organisation.
- › Identify priorities, risks and gaps, including compliance requirements.
- › Establish foundational controls and awareness with a high-level roadmap.
- › Ensure technical and organisational readiness via a training session.

Understand your current posture to build a solid foundation for your data security strategy.

3

Insider risk management and communication compliance:

- › Alignment with stakeholders on policy configuration and triggers.
- › Enablement of Microsoft Purview's Insider Risk Management and Communication Compliance capabilities and integration with Microsoft Defender.
- › Setup of investigation workflow guides and documenting templates for Legal or HR provided.
- › Training for Legal and HR teams.

Address the risks of unmanaged insider threats and non-compliant communications.

2

Sensitivity labelling and data loss prevention (DLP):

- › Application and implementation of sensitivity labels and DLP policies.
- › Configuration and deployment of auto-labelling policies.
- › Refinement, testing and adjustment of policies with your internal team.
- › Training for end users and support materials provided.
- › Strengthening of processes and automated protections.

Monitor and protect sensitive data at scale with automated labelling and DLP policies.

4

Data lifecycle management:

- › Discovery and planning to align with legal, compliance and records retention requirements.
- › Configuration and application of auto-apply rules, record declaration policies, disposition workflows with audit tracking.
- › Setup of Microsoft Purview's eDiscovery.
- › Training for legal, records and compliance teams.

Ensure data is only retained for the agreed length of time with automation.

DATA SECURITY SERVICES

KEY FEATURES

- › **Data discovery and classification** – Understand what data you have and where it lives.
- › **Policy automation** – Use Microsoft Purview to enforce protection.
- › **Identity and access management (IAM) integration** – Ensure only authorised access to sensitive data.
- › **Incident response** – Detect, investigate, and respond to threats effectively.
- › **GRC alignment** – Integrate data security with governance, risk and compliance (GRC).

“ITC’s phased approach helped us build a strong data security foundation and evolve towards proactive protection.”

— **Martin Judge**, *Information Security Manager*, **Mattioli Woods**

WHY ITC

Microsoft Solutions Partner and experts in Purview, IAM, and GRC integration

Trusted by 300+ global organisations

Focus on service excellence with a world-class net promoter score
